

The DSP AP - Starter Kit Installation is composed by the following products

DSP AP LASER TX + RX

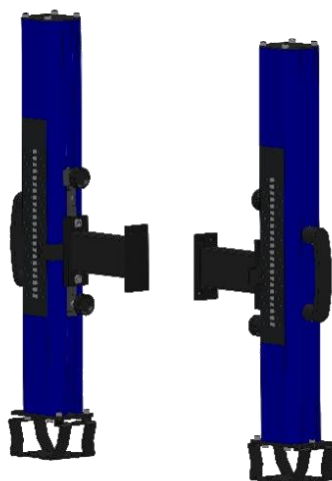

DSP AP is a **visible laser emission barrier** which, realized and placed as described in Standard EN12622, **protects the operator** of the press brake against the danger to be squashed between the upper and the lower tool during the closing of the press in high speed.

PLC MCS

MCS is an electronic module, whose logic has been planned to **monitor and operate the systems and the components present on a press brake**, which ensure a safe use of the press itself according to what foreseen by standard EN12622.

SMART BRACKETS

Smart Brackets are specific model of brackets studied to **handle DSP AP in a press brake** according to what foreseen by standard EN12622.

Run 400 mm
